VIP RUBBER AND PLASTIC COMPANY APPROVED AS SOURCE ON BMS1-52 and BMS 1-74 SPECIFICATIONS

Vip Rubber and Plastic Company (Vip) announced today that the company has been added to The Boeing Company's Qualified Parts List (QPL) for the BMS 1-52 and BMS 1-74 material specifications. This is the newest announcement in a series of approvals Vip has received over the past two years. Several other material specs are currently pending award. Presently, Vip is on the QPL list for the BMS 1-57 and BMS 1-72 material specifications.

Vip joins the short list of Boeing approved facilities who can provide QPL material in several different processes, rather than one single focused application. Vip can extrude, mold and produce both pipe and rubber sheet. "At Vip, we aim to meet the wide range of needs in our industry," said Howard Vipperman, president of Vip Rubber and Plastic. "The additional approvals from Boeing have positioned us to meet even more demand, which is something we are perfectly positioned for, and ready to do."

Vip Rubber and Plastic Company is a custom manufacturer of extruded rubber and plastic, molded rubber, tubing and rubber sheeting. Vip, an AS 9100 and ISO 9001 certified company, began manufacturing in 1961, is family owned and operated, and fabricates all American-made products in their La Habra, California or Minden, Nevada facilities.
